MUGHEER ISLAM KHATTAK

Software Engineer | Backend & Full-Stack Development

Abbottabad, Pakistan | mugheer.ik1@gmail.com | +92-320-5802402 | Linkedin | Github | Portfolio

PROFESSIONAL SUMMARY

Software Engineering graduate (2025) with project-based experience building backend services and full-stack applications using Python, TypeScript, React, FastAPI, and PostgreSQL. Experience with REST APIs, authentication and authorization, relational data modeling, automated testing, and containerized workflows, with a focus on reliable, maintainable software.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL
Backend: FastAPI, REST APIs, Pydantic, SQLAlchemy, Alembic, JWT Authentication, RBAC
Frontend: React, Next.js, HTML, CSS
Databases & Caching: PostgreSQL, Redis
Tools & Testing: Git, GitHub, Docker, Docker Compose, Linux, pytest, HTTPX, GitHub Actions, CI/CD

SELECTED ENGINEERING PROJECTS

Customer360 — Full-Stack Customer Management Platform

Python, FastAPI, React, TypeScript, PostgreSQL, SQLAlchemy, Alembic, pytest, Docker, GitHub Actions | github

- Built a full-stack customer management platform (React/TypeScript frontend, FastAPI backend, PostgreSQL) with customer records, notes, tasks, and an activity timeline, using a modular monolith with service and repository layers.
- Implemented JWT authentication, role-based authorization, Alembic migrations, and automated pytest tests with GitHub Actions CI.

TeamFlow — Multi-Tenant Team Management Backend

Python, FastAPI, PostgreSQL, SQLAlchemy, Alembic, pytest, Docker, GitHub Actions | github

- Developed a multi-tenant REST API for organizations, memberships, projects, and tasks, with role-based permissions (Owner/Admin/Member) enforced server-side.
- Designed the PostgreSQL schema with constraints, indexes, and migrations; added RBAC and cross-tenant access tests, Docker, and GitHub Actions CI.

Doc Service — AI-Assisted Document Processing Application

Python, FastAPI, Next.js, PostgreSQL, Gemini API, Docker Compose, GitHub Actions | github

- Built an end-to-end application for authenticated PDF, DOCX, and TXT submission, AI-assisted analysis, and result retrieval, with user-level resource ownership.
- Implemented asynchronous text extraction, Gemini API integration, and status tracking with PostgreSQL persistence; added Docker Compose, migrations, tests, and CI.

EDUCATION

Bachelor of Science in Software Engineering — COMSATS University Islamabad, Abbottabad Campus | 2021 – 2025

News Broadcast Updates (NBU) — Mobile News Application | github

Final Year Project (team of 3): developed code for a React Native/Firebase app for community-submitted local news, with admin moderation and AI-assisted video summarization (Python/Flask).
